

EBS cottages consist of two container modules dim 2.09x4.09m. **17.16m²**

The steel construction enables transport to the location, quick installation. It also allows relocation.

The insulation is made of polyurethane sandwich panels. Insulation thickness:

Floor PUR 40mm, Roof PUR 60mm, Wall PUR 50mm, which makes quite good insulating properties for the region

The cottages are equipped with bathroom, kitchen, electrical installations, radiators. The carpentry is PVC.

Models:

BASIC	17,16m²
PREMIUM	25,8m²
